BULBS FOR HOUSE CULTURE.

Plant Bulbs in pots or boxes from September to December, in a rich garden loam mixed with a little sand leaf mold, if the latter is obtainable. After planting place in a cool, dark place, watering well every few days. It ought to be kept there until the jar is well filled with roots, which usually takes from three to four weeks. After that length of time it should be brought to light and heat and must be frequently watered. The sooner the Bulbs are planted the sooner they will reward you with blossoms.

BULBS FOR GARDEN CULTURE.

Prepare soil carefully by spading deeply, and have it thoroughly enriched. Plant the Bulbs in October, November and December, about two inches deep, and cover after the first good hard freeze with a course litter of leaves or manure, which should be removed early in spring.

STRAWBERRY PLANTS

We have a large stock of the following varieties, which we have found to be the very best for this section. Our plants are strong, well handled and true to name:

Varieties marked S. are staminate or perfect blossoms, and succeed if planted by themselves.

Varieties marked P. are pistallate or imperfect and should be planted with or near any one of the perfect flower sort.

Special prices on large quantities.

If wanting Strawberry plants sent by mail, add to prices given below 25c per 100 for postage.
